

## Pharmacy Benefits designed for School Districts

**ClearScript brings over 20 years of experience partnering with school districts. We understand the unique complexities, budget sensitivities, and high standards of school district and union benefit plans.**

ClearScript tailors pharmacy benefit plans to help school districts save money, preserving taxpayer funding for students and keeping your employees and their families' well-being at the forefront.

### Fairview

#### Health System-owned PBM

As part of the large nonprofit **Fairview Health Services** and its award-winning **Fairview Specialty Pharmacy and Mail Service Pharmacy**, ClearScript provides high-value pharmacy benefits backed by a trusted health system. We are a mission-driven organization rooted in the values of care, service, and community.

#### Transparency and stewardship go hand in hand

Since the beginning, we have been committed to transparency with our contract terms, pass-through discounts, and rebate arrangements, so you know the true cost of your pharmacy benefit.

Many PBMs don't provide claim-level data like ClearScript. Since plan sponsors have a fiduciary responsibility, lack of transparency makes it difficult to know whether your decisions truly support the needs of your members and the plan. Our transparency empowers you to make informed, cost-effective choices with confidence—knowing we're always looking out for your best interest.

#### Partnerships catered to School District-specific compliance and data sharing

We understand school district regulations and monitor related pharmacy benefit reform legislation so we can help school districts navigate and comply with state Senate bill mandates.

Market checks and audits drive demanding timelines and rigorous analysis. ClearScript promptly and thoroughly delivers data to industry partners so you can meet deadlines and support a thorough analysis. Additionally, we are connected to over 400 industry partner vendors that support you and your third-party partners by sharing data that allows you to better understand your plan's pharmacy costs and ensure a smooth and easy RFP process.

“

*ClearScript is always seated at the table with us to bring recommendations to offer a more cost-effective and better pharmacy benefit program for our members.*

### Prescription solutions that support both members your plan

Given the cost of specialty drugs and overall rising pharmaceutical costs, ClearScript offers alternate funding services for patients to access the drugs they need at affordable prices. We have a team of specialty pharmacy assistance experts who go above and beyond to find cost-effective solutions that positively impact members' health and in turn keep plan costs affordable.

ClearScript also designs your plan with a high level of flexibility that is uniquely customized for your school district and its members. ClearScript's pharmacy benefit management experts present a full suite of solutions where you can determine copays and other plan parameters that benefit your plan's population and utilization.

### White-glove services from day one and every day

ClearScript's account services team is unlike traditional PBM account management models. Our consultative account services professionals monitor your plan utilization, keep you informed of industry trends, and offer data-driven recommendations for your pharmacy spend and drug utilization.

### Free Assessment

To see exactly how much value ClearScript can add to your benefit plan, we'll perform a free assessment. Our unique, measurable optimization process analyzes your existing program and pinpoints gaps and savings opportunities. We will then make specific recommendations to improve your program, reduce costs and optimize the health of plan members.
